

Registration is now open for the 2018 Conservation in Action Tour!

The Conservation Technology Information Center (CTIC) has officially opened registration for the 11th annual Conservation in Action Tour, which will take place near the country's largest estuary, the Chesapeake Bay, in Annapolis, Maryland on July 10 and 11, 2018.

This year's tour theme is "Bringing Back the Bay: Partnerships, Profitable Farms, Clean Water & Innovative Conservation." The tour will give attendees a front row view of how the area is leading the way in innovative conservation to improve water quality and will also showcase the conservation practices that farmers have implemented to improve our environment both at the local level and downstream.

"Our 11th Conservation in Action Tour will highlight the maritime setting of Annapolis and give insight into the behind the scenes work that has helped protect the Chesapeake Bay," said Chad Watts, CTIC's executive director. "Our goal is to highlight conservation success and introduce our tour participants to the innovators and the diverse partnerships that help drive positive change in water quality in an area of such importance."

Attendees can expect to visit thriving, profitable farms who are leading the way by going above and beyond when it comes to conservation agriculture. We'll see those in action at our tour stops, which include:

Hutchison Farms

The Hutchison Brothers grow corn, soybeans, wheat, barley, peas and lima beans for processing, and cucumbers for pickling. Their home farm sits on the Tuckahoe River and showcases advanced nutrient management practices including Greenseeker, bioreactors and water control structures.

Councill Farms

Chip Councill is a renowned 10th generation farmer both on the eastern shore and around the world for his nutrient management plan. Councill's farm consists of over 2,000 acres of corn, soybeans, wheat, fresh market vegetables and timber. The farm includes an agri-tourism operation offering a fruit and vegetable stand, an annual straw maze, and a pick-your-own-pumpkin patch. In 2015, the Councill family was inducted into Maryland's Agriculture Hall of Fame.

REGISTER NOW!

THANK YOU SPONSORS!

The 2018 Conservation in Action Tour is hosted by CTIC with the generous support of our tour sponsors

Evening Social John Deere

Diamond
Bayer CropScience
Monsanto
The Mosaic Company

Platinum
Dow AgroSciences
Syngenta
The Fertilizer Institute

Sponsorship opportunities are available! Contact Chad Watts at watts@ctic.org or (765) 494-9555

"These farmers have taken the charge to protect Chesapeake Bay seriously, voluntarily going above and beyond the regulations to use practices that will not only benefit water quality, but also protect productivity and profitability on the farm," Watts said. "They are living proof that agriculture can thrive in the face of regulation."

Tour sponsorship opportunities are now available. For more information, contact Chad Watts, watts@ctic.org or call 765-494-9555.

For information, including registration, please visit www.ctic.org/CIATours.

The Conservation Technology Information Center (CTIC) is a national, public-private partnership that champions conservation agriculture and serves as a clearinghouse for information on conservation farming issues and practices, as well as a facilitator for training and workshops.
